MULTIPLEX GOLD Maize Special

MULTI MICRONUTRIENTS FERTILIZER

FOR SOIL APPLICATION

The cultivation of maize repeatedly in the same field, results in the progressive depletion of essential nutrients from the soil. This depletion certainly leads to a noticeable decline in the health of the crop and their overall productivity. To effectively address this challenge, the use of Multiplex Gold is strongly recommended. This product is uniquely developed to deliver a precise and balanced concentration of vital secondary and micronutrients essential for maize growth. Multiplex Gold is specifically manufactured to cater nutrients at different growth stages of the maize plant, ensuring that it receives all necessary nutrients at every phase of its development. By rectifying nutrient deficiency, it enhances the quality of the crop and also significantly boosts the quantity of the yield, leading to a bountiful harvest.

DIRECTION FOR USE

Use 10 kg of Multiplex Gold per acre in two split doses 5 kg of Multiplex Gold should be applied at the time of sowing to ensure that sown seeds receive a balanced essential nutrient right from the germination. This initial application helps to promote robust germination and early plant development. The remaining 5 kg of Multiplex Gold should be applied 30 days after sowing. This application is crucial as it provides additional nutrients necessary for continued growth and supports the plants during a vital stage of their development, leading to increased quality and quantity of the yield.

BENEFITS OF MULTIPLEX GOLD

- ◆ It contains of essential Secondary and Micronutrients
- ◆ Helps in the uniform emergence of maize plants
- ◆ It corrects the deficient nutrients instantly and thus improves grain yield both by quality and quantity
- ◆ Increases cob length, uniform cob filling and enhances kernel weight
- ◆ Improves the quality of QPM (Quality Protein Maize) of Baby Corn, Sweet Cron, Popcorn
- ◆ It improves the nutrient content of Maize grains and thus grains when used in the manufacture of Poultry feed and cattle feed, will improve the yield parameters both in Poultry and in Cattle
- ◆ Improves the yield both by quality and quantity

Available Packing: 5 kg & 25 kg
