# ONION & GARLIC SPECIAL

MULTI-MICRONUTRIENT FERTILIZER

Increases **ONION** & **GARLIC** bulb size, uniformity, colour, firmness and pungency.

*Farmers' first choice since 1974*

# ONION & GARLIC SPECIAL

MULTI-MICRONUTRIENT FERTILIZER

The Multiplex Group has developed Onion & Garlic Special, a crop-specific fertilizer containing essential secondary and micronutrients for onion and garlic crops in readily available form. Onions and garlic have limited fibrous roots, which must support the development of larger bulbs. Additionally, onions produce fewer small leaves that have a reduced capacity for photosynthesis. To address these limitations, the application of balanced nutrients can be extremely beneficial. This product is developed to correct nutrient deficiencies prevalent in our soils, particularly in major onion and garlic-growing regions. It supplies a balanced quantity of Sulphur, Zinc, and Boron micronutrients that support efficient nutrient uptake during critical growth stages, helping to improve overall crop vigour, bulb development, and preventing physiological disorders. Moreover, the application of Multiplex Onion & Garlic Special not only fosters healthier crops but also enhances the keeping quality of the harvest. By reducing post-harvest losses, this premium fertilizer ultimately contributes to a more sustainable and profitable yield for farmers, ensuring that their hard work culminates in a bountiful and enduring harvest.

## DIRECTION FOR USE

**Foliar Application:** Mix 2 to 3 ml of Multiplex Onion and Garlic Special in one litre of water and spray uniformly on leaves during active growth stages. We recommend three sprays for better crop development. First spray 20 to 25 days after transplanting. Second spray during bulb initiation and third spray during bulb development.

**Fertigation:** Fertigate one liter of Multiplex Onion & Garlic Special per acre.

**Soil Application:** Apply 10 kg of Multiplex Onion and Garlic Special in two splits, 5kg at the time of transplanting and 5 kg at the time of bulb development.

## BENEFITS OF MULTIPLEX ONION & GARLIC SPECIAL

- ◆ Uniquely formulated with secondary and micronutrients for bulb crops
- ◆ Enhances root development and nutrient uptake
- ◆ Supports vigorous growth throughout the crop cycle
- ◆ Increases bulb size, uniformity, colour, firmness and Pungency
- ◆ Helps to overcome transplant shock
- ◆ Reduces Physiological disorders (eg., poor bulb formation, splitting) by correcting hidden nutrient deficiency
- ◆ Enhances keeping quality and reduces post-harvest loss
- ◆ Improves yield both by quality and quantity

**Available Packing:** Foliar Application - 250 ml, 500 ml & 1 litre  
Soil Application - 10 kg
